

With Smart Layout Assistant and Remote PC Controller Technology

INTELLICUT GLOBAL REMOTE PC CONTROLLER (IGRPC)

- Connect directly to the AeroCut embedded controller with Intellicut Global and PC LAN connection.
- The IGRPC emulates the AeroCut embedded controller and provides full functionality from your desktop PC.
- All AeroCut job program settings can be updated and saved remotely to the AeroCut controller with the IGRPC.

AEROCUT PRESET TEMPLATE MANAGER

- Instantly produce print files for 266 Preset templates with full barcode support.
- Supported by Fiery Impose in Fiery Driven™ print environments.

SMART LAYOUT ASSISTANT

- Create AeroCut Manuset custom templates with guaranteed AeroCut compatibility.
- Send custom generated Manuset template settings directly to the networked AeroCut.
- Manage your AeroCut's template library from your networked PC.

ADVANCED IMPOSITION FEATURES

- Multi-page PDF splitting, imposition and ordering.
- Easy imposition layout adjustment with AeroCut compatibility protection.
- Toggle advanced imposition project settings such as record repeat and record direction.

Bundled with every AeroCut X and AeroCut X-Pro.

AEROCUT *with* INTELLICUT GLOBAL

Intellicut Global unifies the PC Controller, PDF Imposition, and AeroCut programming into a single PC platform to provide an all-in-one smart solution.

The AeroCut family of Slitter/Cutter/Creaser Finishers come standard with an embedded controller and Intellicut Global software. The software integration through network connection uniquely delivers a higher level of automation to the slitter/cutter/creaser digital finishing workflow and reduces tedious and time consuming prepress and postpress finishing tasks.

The AeroCut X/X-Pro include 3 template layout modes and 416 memory locations

Access [Preset]

No downloading or programming
Preset mode contains 266 templates already programmed in the AeroCut memory and Intellicut Global library. The pre-programmed and barcode-ready job layouts included with AeroCut are based on popular cut and paper sizes, representing common jobs like business cards and postcards. Simply pull up the template, place the artwork, and impose the job with Intellicut Global or other imposition platforms.

Manipulate [Manuset]

Custom templates made easy with Intellicut Global's Smart Layout Assistant
Intellicut Global's Smart Layout Assistant makes custom layout and template creation easy. Simply select paper size, cut size and bleed edge and the Smart Layout Assistant determines the most optimal AeroCut compatible layout. With LAN connection, download the template directly to one of the AeroCut's 100 Manuset memory locations.

Design [Flexmode]

AeroCut Flexmode gives users total design control over sophisticated jobs
In Flexmode you can set each cut, crease, perf and jump perf in any combination and in either direction. Intellicut Global provides a user-friendly configuration workflow with its point and click drawing design interface. Download Flexmode templates to 50 memory locations on your AeroCut directly from your PC.

Read and write directly to the AeroCut controller over your LAN

Step 1: Use Intellicut Global's Smart Layout Assistant to automatically create an AeroCut compatible layout, then add artwork to create your print-ready PDF with the AeroCut barcode.

Step 2: Send the print-ready PDF created by Intellicut Global to your printer, these will be perfectly imposed and will include an AeroCut barcode.

Intellicut Global can download the document layout template created by Smart Layout Assistant directly to your AeroCut through your office network.

Step 3: Place your printed output on the AeroCut. It automatically reads the barcode, adjusts the machine precisely and cuts! Even if page layouts change, the AeroCut adjusts on-the-fly.
